

Continuing Education Activity Summary: **Environmental Coatings Compliance**

Provider:	Tnemec Company, Inc.	Length:	1 Hour
Program #:	TNE007	Credit:	1.0 LU/HSW/SD, 1.0 PDH
Program:	Environmental Coatings Compliance	Method:	Live Instruction

Program Description: This program will give the participant an understanding of the complexities of specifying performance- based coating systems on environmentally sensitive projects. The changing legislation of the various air districts throughout the United States, and the requirements of each, will be outlined. This understanding will allow specifiers and owners to recommend the appropriate coating system to meet the intent and requirements of both voluntary programs such as LEED and the various government mandated environmental control measures.

Learning Objectives:

- Provide an overview of current and future regulations of the various air districts throughout the US and how the industry is changing to meet the challenge
- Describe coating sustainability and how high performance coatings can be used on LEED & other environmentally focused programs
- Discuss life cycle assesment on long-term performance coatings and the resulting impact on the environment
- Understand that regulations can vary significantly from region to region, and also depending on if the coating is applied in shop or in the field

Presenter Qualifications: All Tnemec continuing education presenters have been trained on AIA/CES and NCEES RCEPP guidelines. In addition, they receive continuous in-depth field training and are considered industry experts.
