

Continuing Education Activity Summary: **High Performance Coatings**

Provider:	Tnemec Company, Inc.	Length:	1 Hour
Program #:	TNE005	Credit:	1.0 AIA/CES LU (HSW) / 1.0 PDH
Program:	High Performance Coatings	Method:	Live Instruction

Program Description: This program will cover the various types of high performance coating systems for interior and exterior exposed surfaces. Discussion will center around how high performance coating systems can provide additional protection and beautification for high-profile projects or areas subjected to harsh environments and abuse.

Learning Objectives:

- Learn about the difference between paint systems and coatings systems.
- Discuss coating selection for different types of systems.
- Learn how coating systems can be integrated into a project's overall design
- Discuss how coating systems can enhance long-term durability and provide life-cycle value.

Presenter Qualifications: All Tnemec continuing education presenters have been trained on AIA/CES and NCEES RCEPP guidelines. In addition, they receive continuous in-depth field training and are considered industry experts.
